How to Change a Computer Desktop Background

The computer desktop background (also known as "wallpaper")

Tips and Warnings

Try to choose fairly large pictures for desktop backgrounds. If a small picture is used, it tends to appear stretched and blurry on the desktop.

Be sure to only access sites that have pictures that are not expressly copyrighted. If a picture was not posted with the intention of sharing it, it is not a good idea to use it as a desktop background.

Macintosh OS X Users

01. Locate the picture you wish to make your desktop background
02. Right-click the image and choose "Save Image As a name of your choice..."
03. Save the picture in Finder to the "Pictures" folder on your computer's main folder.
04. Right-click a point of unoccupied space on your current desktop and click "Change Desktop Background..."
05. Navigate to the Pictures folder and find your image.
06. Select the image in the Pictures folder that will become the desktop background.

07. Close or minimize all open windows and applications in order to view your new background.

For Windows Users

01. Access the Internet.
02. Navigate to the picture online that you wish to change to your desktop background.
03. Right-click the picture and select "Set as Desktop Background..."
04. Minimize or close the Internet browser and all other open windows and applications in order to view your new background.

The images are selected in accordance with the size of each device or monitor.

Here you can get an idea of the sizes. Actual sizes vary but a chart is in the help section with guidelines.

1280 x 1024 -Average Desktop Monitor

1024 x 768 - Laptop Monitor

320 x 240 - Blackberry Wallpaper

320 x 480 - Cellphone and iPhone Wallpaper

1024 x 1024 - iPad Wallpaper

1280 x 800 - Android Wallpaper

centered 600 x 1024 - PlayBook Walpaper region of the 1024x1024 canvas
